

Abd Alwahab

Senior Frontend Developer

Erbil, Iraq | abdalwahabb7@gmail.com | +964 773 151 0682 | abdalwahab.dev | linkedin.com/in/abd-alwahab | github.com/Abd-Alwahab

Senior Frontend Developer with 7 years of experience in JavaScript, TypeScript, React, and Next.js. Currently leading frontend work on Turkey's largest tourism platform (2M+ monthly users), with a focus on performance optimization (Core Web Vitals), build tooling, accessibility, and production reliability. Comfortable across the delivery pipeline: Docker, Azure DevOps CI/CD, and monitoring. Fluent in Arabic, English, Turkish, and Kurdish.

PROFESSIONAL EXPERIENCE

Senior Frontend Developer | Setur (setur.com.tr)

Jan 2021 - Present

Promoted from Frontend Developer in 2022

React, Next.js, TypeScript, Styled-Components, Tailwind CSS, Docker, Azure DevOps

- Lead frontend development on Turkey's largest tourism platform serving 2M+ monthly users, delivering booking, search, and dashboard features in collaboration with UI/UX designers, QA, backend, and DevOps teams.
- Migrated the B2C client build system to Turbopack, cutting local build times by ~5x and reducing build disk usage by ~18x, significantly improving developer iteration speed across the team.
- Investigated and fixed Core Web Vitals regressions (CLS, INP) on setur.com.tr, including a mega-menu layout-shift fix using animation gating and a sticky search bar scroll-container bug caused by overflow handling.
- Architected a reusable UI component library of 25+ components with React, Storybook, and Styled-Components, adopted across 5 major projects and significantly reducing feature development time.
- Hardened the production Dockerfile with multi-stage builds, a non-root user, healthchecks, and Next.js standalone output, shrinking image size and improving deployment security posture.
- Configured Sentry error monitoring for KVKK (Turkish data-protection) compliance, masking PII while preserving actionable error context for the team.
- Led a Key Vault secrets-migration review and resolved recurring Azure DevOps pipeline failures, keeping CI/CD reliable for daily releases.
- Mentor junior developers through code reviews and pair programming sessions.

Frontend Developer (Contract) | White Label Solutions

Aug 2024 - Jan 2025

React, Next.js, TypeScript, Tailwind CSS, Laravel API

- Built a high-performance, responsive 10-page automotive marketing site with Next.js and Tailwind CSS, integrating a Laravel backend for real-time content updates - owning frontend architecture, API integration, and deployment end to end, delivered in parallel with full-time work.

Frontend Developer | Bestimate

Feb 2020 - Dec 2020

React, Redux, Node.js, JavaScript, Bootstrap

- Led the migration from client-side to server-side rendering with Next.js - materially improving organic search traffic and cutting initial page load time by ~2 seconds - and introduced a unit and functional testing strategy that reduced post-release bugs.

Course Instructor | Udemy

Aug 2018 - Dec 2020

JavaScript, React, Node.js, Full-Stack Development

- Created 4 full-stack development courses: 15,000+ students across 142 countries, 4.7 average rating, 1M+ minutes taught.

SELECTED PROJECTS

Learn Iraqi From Scratch (self-published product)

2025 - 2026

- Authored a complete Iraqi Arabic language-learning ebook with a custom design system; currently in audio production ahead of launch, with a companion web app planned (Next.js).

SKILLS

Frontend: JavaScript (ES6+), TypeScript, React, Next.js, Redux, HTML5, CSS3, Tailwind CSS, Styled-Components, Storybook, Responsive Design, Accessibility (WCAG)

Performance: Core Web Vitals (LCP, CLS, INP), SSR/SSG, Turbopack, bundle optimization, Lighthouse

Tooling & Infra: Git, Docker, Azure DevOps (CI/CD), Azure Key Vault, Sentry, Node.js, RESTful APIs, Testing (unit/functional, TDD)

Languages: Arabic (native), English (fluent), Turkish (professional), Kurdish (fluent)
